

OUR VISION

We have developed a program, which if followed, provides a personalized path to recovery from addiction. This structured program is designed for each patient and is predicated upon an in-depth needs assessment, a professional evaluation of the assessment, and an implementation of each patient's individual program of recovery, utilizing the mind, body, and spirit. The program at the Kentuckiana Center for Addiction Medicine nurtures each patient to recover within an out-patient, real world environment.

Our physicians and counselors are committed to reviewing and implementing the latest and best advances in the fields of addiction treatment. The experience of all of the professionals at KCAM has taught us that our patients flourish best when enveloped in an environment of mutual respect and support. Here they are allowed to learn how to make healthy choices.

Our patients come first. That's why we make a concerted effort to get to know each client as an individual. We work with our clients to develop a treatment plan tailored to their individual needs that will help them obtain the recovery they're seeking. We understand that addiction treatment is not easy and that there's no "one-size-fits-all" method to achieve it.

A well-designed, individually customized treatment plan can mean the difference between succeeding or failing at treating a substance use disorder

SUPPORT

Ongoing Help and Support

A certified Peer Support Specialist is someone with personal experience in recovering from addiction. Our recovery coaches have been professionally trained as peer support specialists and are qualified to guide our patients along the road to recovery.

- Certified peer recovery support specialists
- Guidance when you need it

What Is an Addiction Monitoring Program?

During our patients' treatment programs, we document their progress at every step of the way. We understand that addiction case management doesn't end when a patient is sober for 24 hours or 7 days. Long term case management is often necessary for real long-term recovery. Additionally, many of our clients require drug probation reporting or a drug testing monitoring program for legal or professional reasons, which we are happy to provide.

LAB & PHARMACY

Our lab's innovative tools provide actionable insight to help improve outcomes and more effectively manage substance use disorder, mental health, and criminal justice programs.

Offering Stigma-Free, Compliance-Focused Pharmacy Services

Our pharmacy solution helps supplement providers' strong compliance programs when writing prescriptions and ensures that patients have convenient access to their needed medications. Our clients have the option of picking their medication up at our office the day of their visit.
